Load My Mouth Review

It's pretty easy to guess what Load My Mouth is all about: messy facials and mass ejaculation into babes' open and waiting mouths. The action that each episode contains is just as predictable, with pussy fucking, anal fucking, titty fucking, some pretty kinky and crazy positions, all leading to that cum-filling finale. Sometimes being more original will score a site extra points but in the case of Load My Mouth they don't lose any for just keeping to tradition. After all, if its not broke, don't fix it, right? With an almost overwhelming amount of content, a huge list of pornstars and a massive bonus network Load My Mouth is going to be a site for more than just the cumshot fans out there – if you like hot babes and porn, you'll want to check this out right now.

Brandon Iron is the male star that appears in every video, well at least his big white cock does. Every scene is filmed in POV style and you really feel like you're the guy fucking all these gorgeous pornstars with perfect tits and asses and the uncanny willingness to let you penetrate their every hole with your very large cock. To name just a few of the babes here I'll make a short list: Tory Lane, Alianna Love, Eva Angelina, Sativa Rose, Missy Stone, Anita Blue, Ana Nova and Rikki White. There are also many other amateur and teen babes that you may recognize but aren't "superstars" yet in the porn world. As mentioned in the intro you get a good mix of traditional hardcore action, but there are a few threesomes, footjobs, titty fucking and the like as well as pussy and anal pounding.

This action is available in almost 500 video episodes at the time of this review, but with updates every 2 to 3 days that number will just keep getting larger. Every video is about 20 minutes long and you'll have two real options for downloading: DVD quality full-length Windows Media or shorter clips in

average quality WMV and MPEG format. You'll want to just stomach the wait and download the full-length version as the quality is really spectacular. I was able to expand these videos to full screen at no loss of quality. You also get some screen caps with each video that will help you see what type of action is in every scene. This is actually a nice feature since the site lacks any type of browsing or searching functions. Instead you get a page with around 500 thumbnails labeled with the pornstar's name and that's the only way to browse the content. Not exactly ideal by any means.

In addition to the massive loads of content here you get access to 62 bonus sites in over two dozen hardcore niches. Some of these sites include: Pornstars Analyzed, Deep In Cream, Club Peter North, I Want Latina and Lex POV to name just a few. If you want massive amounts of good hardcore content then give Load My Mouth a try.
